

WORKSHOP ON MODELING & SIMULATION OF SYSTEMS AND APPLICATIONS

Workshop on Modeling & Simulation of Systems and Applications
August 10-12, 2016 – University of Washington

Abstract Submission Guidance

Workshop URL: <http://hpc.pnl.gov/modsim/2016/>

Submission URL: <https://easychair.org/conferences/?conf=modsim20160>

In the interest of providing concise, useful abstracts to the ModSim 2016 review committee, the following are all points to consider including when drafting an abstract. There is no set word limit but please limit your submission to one page. The abstract should provide an overview that adequately summarizes the topic(s) presented and any proposed impact on ModSim research or techniques.

Abstract Title

Primary research area:

- Advanced Architectures (including beyond CMOS)
- Modeling Integrated Workflows
- Integration of Measurement and ModSim
- ModSim Methods and Tools

What is being modeled? (e.g., performance, reliability, power, other)

What is the target application?

What modeling techniques are being used?

What is novel about the approach versus current state of the art?

Are preliminary results available?

Upon selection, invited contributors will be notified if a presentation or poster is required.
